SUMMARY

I'm a Frontend Developer with experience in AI & Big Data at DEKRA, building AI-driven web applications with a strong UX/UI focus from wireframes to implementation.

I've led large-scale projects and collaborated with international teams in English, aiming to grow further by applying best practices to create scalable, user-centered web experiences.

PROFESSIONAL EXPERIENCE

Frontend Developer & UX/UI Designer

DEKRA Digital & Product Solutions, Málaga, Spain
2023 - Present

Role summary:

Designed and developed web applications supporting AI solutions, including chatbots, image recognition tools, and internal dashboards. Bridged frontend development with UX/UI design while collaborating with international teams using English as the main working language.

Key responsibilities & achievements:

- Led and maintained multiple AI department web applications, from system architecture to UI implementation.
- Created wireframes, user flows, and mockups in Figma and Excalidraw, implemented in React and Angular.
- Built modular, maintainable interfaces using TypeScript, Tailwind CSS, and modern component-based patterns.
- Collaborated with international teams of developers, data scientists, and managers in English.
- Enhanced user experience and interface performance across core AI applications.
- Worked within Agile/Scrum methodologies using Azure DevOps, GitLab, GitHub, and Jira.
